AVERAGE PERFORMANCE BY SDG

- A National Sustainable Development Strategy was adopted in 2015.
- Closely involved in the development of global indicators.
- Key priorities include:
 - Reducing social, educational & gender inequalities
 - Maintaining healthy eco-systems & sustainably managing natural resources
 - Reducing unemployment, particularly youth unemployment.

- A national action plan for SDGs will be developed to complement NSDS supported by a committee of international experts & public consultation.
- The Interministerial Representative for Sustainable Development and General Commissioner for Sustainable Development tasked to monitor SDG implementation.
- Work is underway to develop national SDG indicators.
- Actively defends carbon pricing at European & international levels
- Considers civil society, private sector, public involvement in implementation to be key.

- National action plan for SDGs to be driven by broad mobilization through:
 - shared vision
 - Govt measures & public policy guidelines for sustainable development
 - Assistance to economic & other players in their field of activity
 - Citizens' ownership of the SDGs
 - Roll-out at all levels (national, regional & local)
 - International actions, particularly within the context of the EU, the International Organisation of Francophonie & the UN
 - Synergies between & promotion of good practices by all players
- Participatory internet platform for sharing best practice, monitoring progress & forming coalitions.
- Annual European Sustainable Development Week to galvanize action.

France – Examples of what business can do

- New Face of Industry in France initiave aims to position French businesses on new economic growth markets.
 Capitalize on these opportunities by mainstreaming environmental goals & joining projects backed by the initiative.
- Support the Industry of the Future programme that aims to modernize French industrial production through digital technology & improve energy efficiency in industrial processes.
- Work with national & local authorities to develop solutions for energy-smart housing retrofits & efficient public transport networks funded by the Energy Transition Fund that aims to promote low-carbon & green urban areas.

- Work with the government to develop solutions that help protect marine & land ecosystems against artificial land cover, overexploitation, climate change & pollution.
- Educate & train workforce to help employees acquire the skills needed for the new economy. Collaborate with government to help reduce youth unemployment.
- Engage in development policy & financing to benefit from a large array of financial tools such as grants, soft & hard loans, equity stakes & guarantees available to public & private partners to foster sustainable development.
